Patient Appointment Reports Suite — Report Types Use Case

Aim:

To design and build a set of nine Zoho Creator report types for the **Patient Appointment & Scheduling Management** application, enabling front-desk staff, doctors, and clinic administrators to browse appointments, monitor status and schedules, study department workload, and review patient and doctor data.

Reports Used Overview

Report Type	Report Name	Purpose / Key Configuration
List View	All_Appointments_List	Lists appointment records with Patient Name, Department, Gender, Preferred Appointment Date, and Status for review and search.
Spreadsheet View	Appointments_Spreadsheet	Shows an editable-style grid for tracking Department, Check-In Status, Consultation Status, and Payment Status.
Kanban View	Appointment_Status_Kanban	Organizes appointment cards by stage, including Requested, Confirmed, Checked-In, Consulted, and Cancelled.
Calendar View	Appointment_Schedule_Calendar	Shows patient appointment bookings on calendar days using the preferred appointment date.
Map View	Patient_Residential_Map	Displays patient residential locations as pins on a map for geographic reference.
Timeline View	Appointment_Activity_Timeline	Provides a week/day time-axis view for appointment activity; no entries are visible in the supplied time window.
Pivot Table	Department_By_Gender_Pivot	Cross-tabulates departments against patient gender and summarizes appointment counts.
Chart View	Department Load Chart	Compares the number of appointments in eight medical departments as a bar chart.
Summary View	Doctor_Wise_Summary	Groups patient cards by assigned doctor and displays visible group counts, including Unassigned.

Detailed Report Descriptions

1. All_Appointments_List (List View)

Displays 20 appointment records in a list with columns for patient name, department, gender, preferred appointment date, and appointment status. The visible dates extend from 20 October to 8 November 2026.

2. Appointments_Spreadsheet (Spreadsheet View)

Shows 20 rows with dropdown-style controls for the department, check-in, consultation, and payment fields. Visible examples include Not Arrived, Checked-In, Pending, Completed, In Progress, Cancelled, and Paid. Role-based edit restrictions were not demonstrated.

3. Appointment_Status_Kanban (Kanban View)

Displays cards with patient and department information under requested, confirmed, checked-in, and consulted statuses in the 05a screenshot. The separate command-center page also shows a Cancelled status group. Drag-and-drop behavior was not tested.

4. Appointment_Schedule_Calendar (Calendar View)

Shows the October 2026 month calendar with patient appointments on their preferred dates. Month, Week, and Day options are visible, with early November dates included in the displayed grid.

5. Patient_Residential_Map (Map View)

Displays blue markers for residential locations on a map centered around the Chennai region. The screenshot does not show department-specific pin colors.

6. Appointment_Activity_Timeline (Timeline View)

Shows a navigable week/day timeline for 18–24 October 2026. No activity entries appear in the captured viewport, so populated event tracking cannot be verified from this screenshot.

7. Department_By_Gender_Pivot (Pivot Table)

Summarizes 20 patient appointments across eight departments. The grand total comprises 11 female and 9 male patients; Cardiology, General Medicine, Orthopedics, and Pediatrics have three records each.

8. Department Load Chart (Chart View)

Bar chart values show Cardiology 3, Dermatology 2, ENT 2, General Medicine 3, Gynecology 2, Neurology 2, Orthopedics 3, and Pediatrics 3, for a total of 20 records.

9. Doctor_Wise_Summary (Summary View)

Displays doctor-grouped patient cards. Visible groups include Unassigned (1), Dr. Anand Rajan (3), Dr. Arjun Desai (0), and Dr. Divya Kumar (0). Other groups may be outside the viewport; the report-builder type is not independently visible.

Screenshots:

The following screenshots are taken from the Patient Appointment & Scheduling Management application in Zoho Creator.

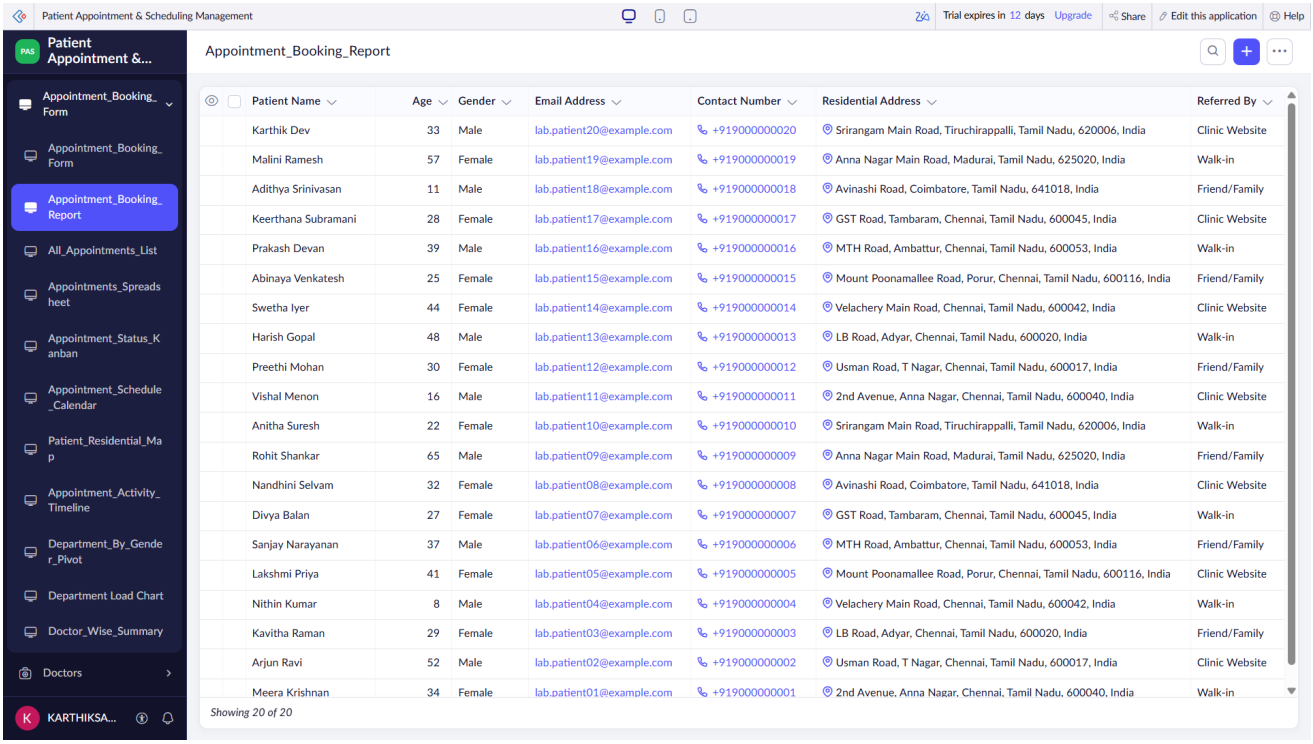

Figure 1. Appointment_Booking_Report — patient appointment source records.

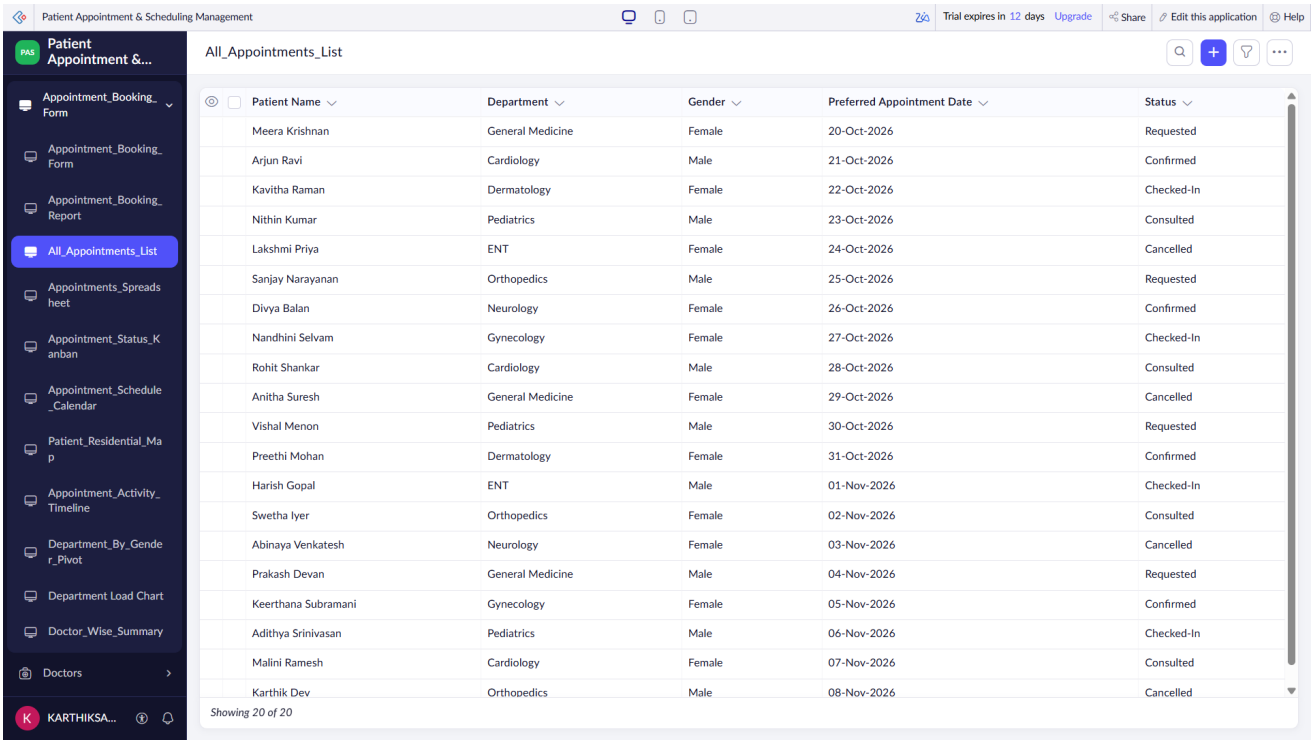

Figure 2. All_Appointments_List — list view.

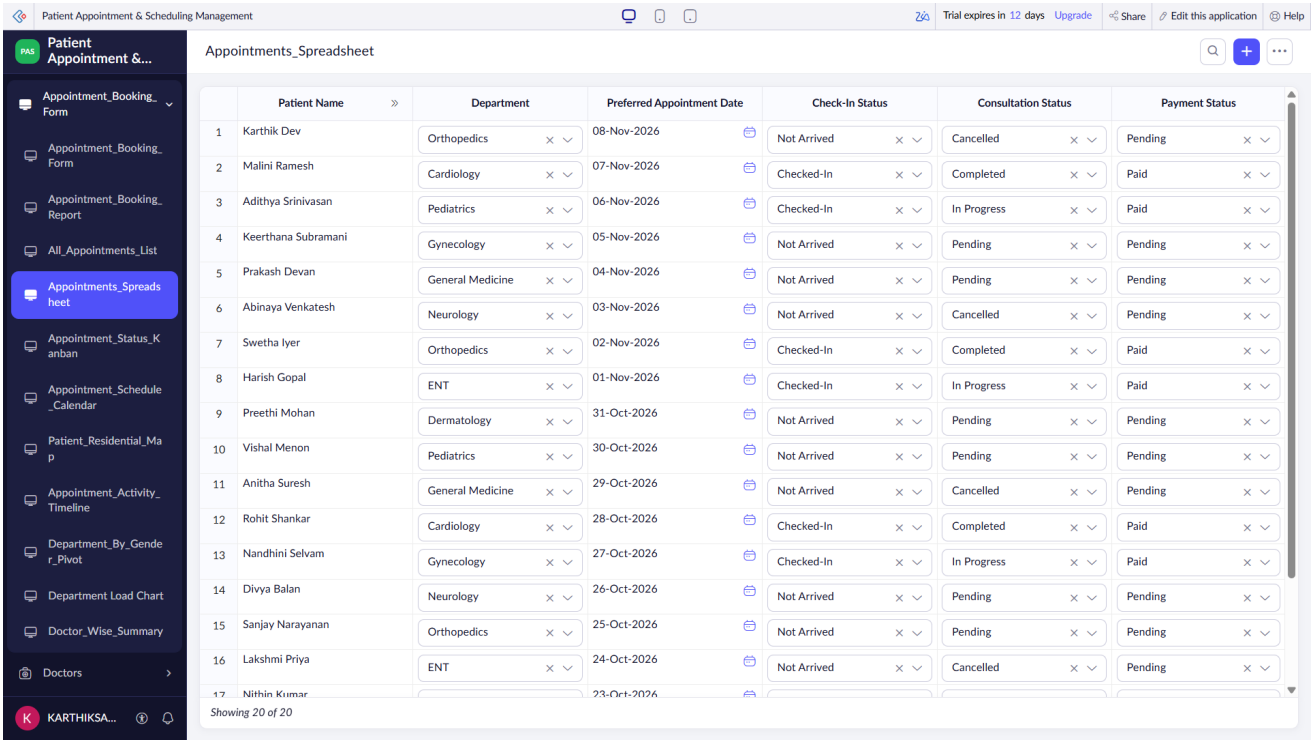

Figure 3. Appointments_Spreadsheet — spreadsheet view.

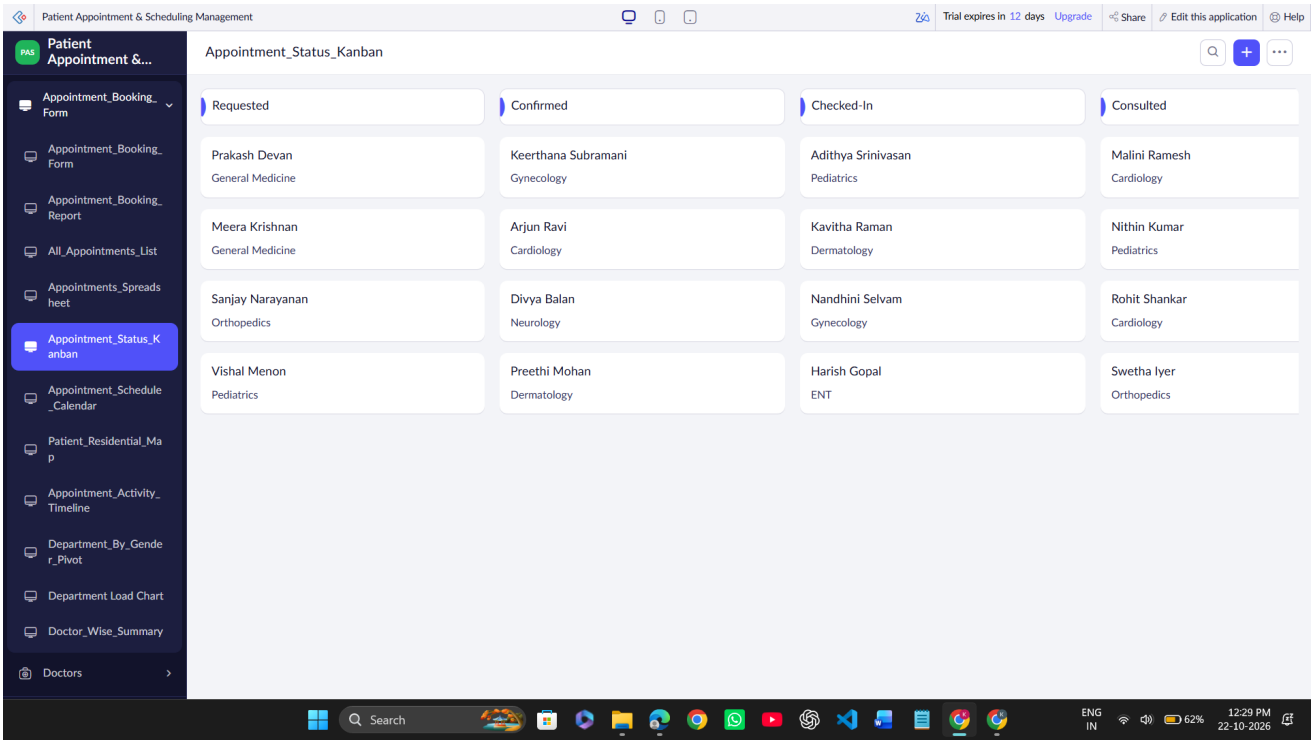

Figure 4. Appointment_Status_Kanban — Kanban view.

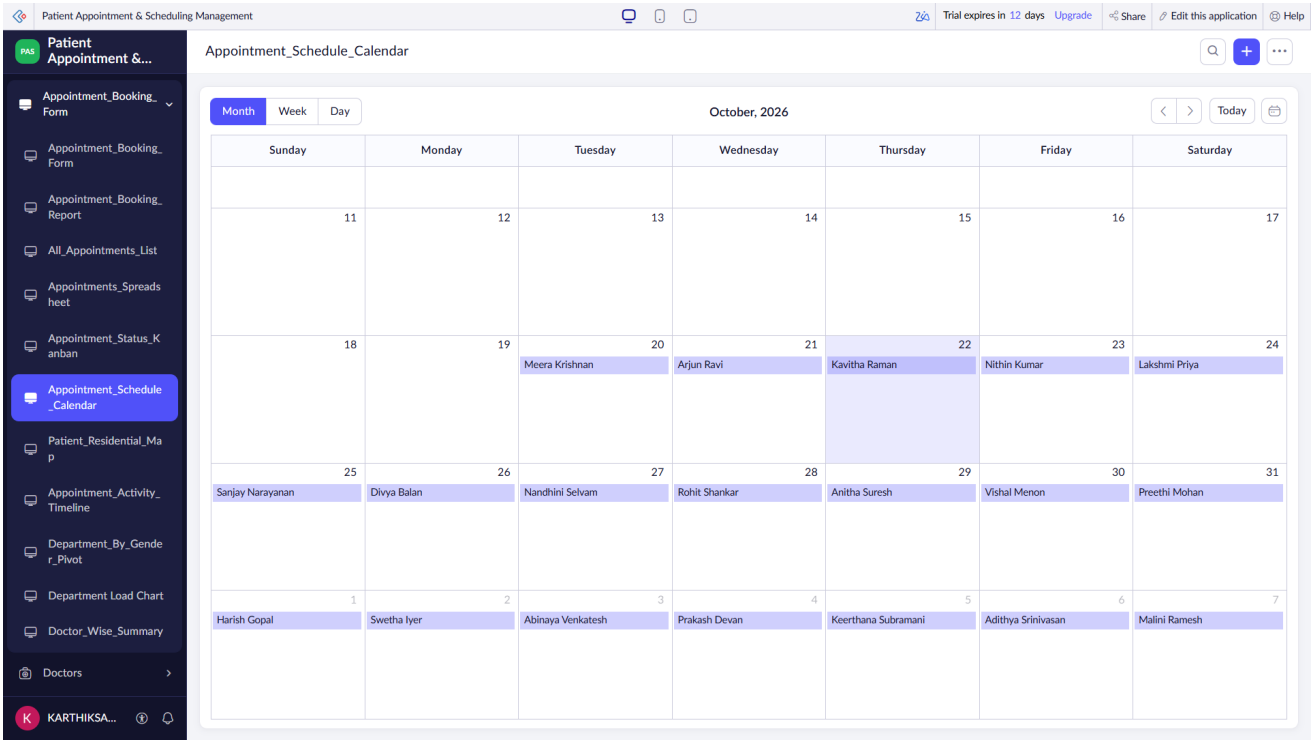

Figure 5. Appointment_Schedule_Calendar — calendar view.

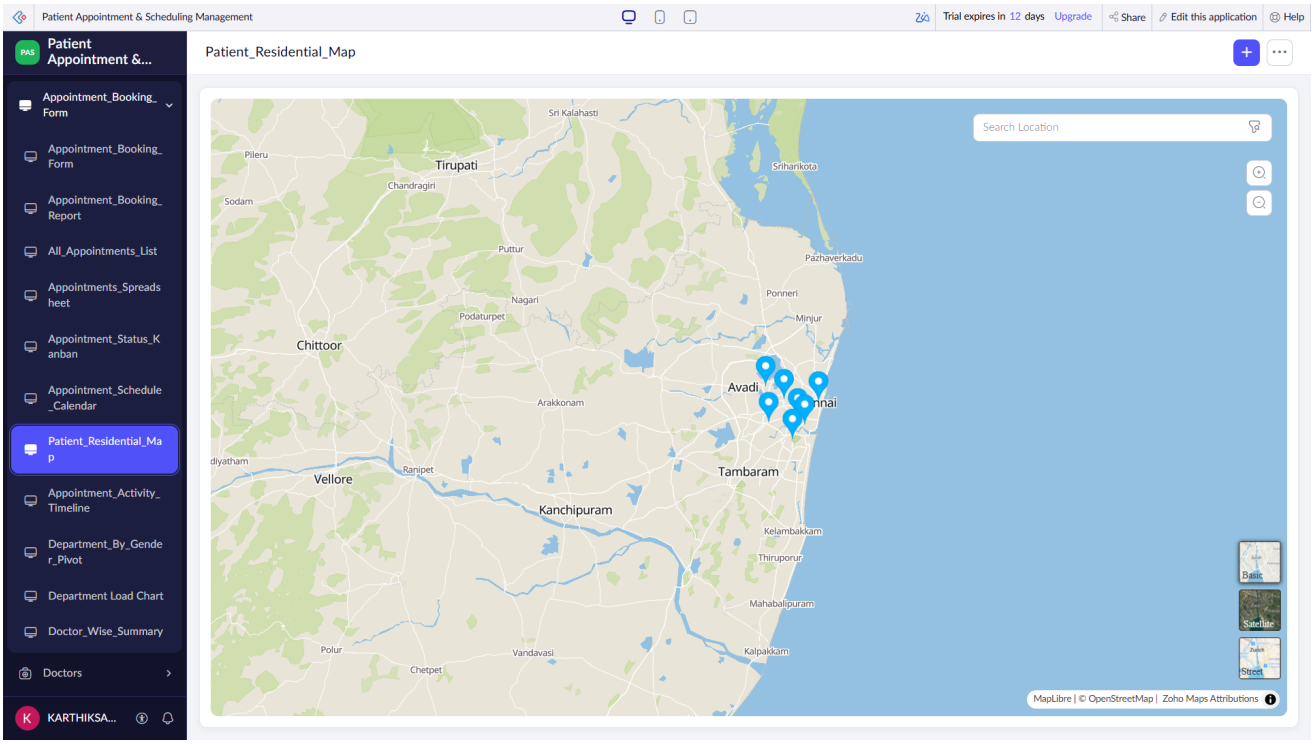

Figure 6. Patient_Residential_Map — map view.

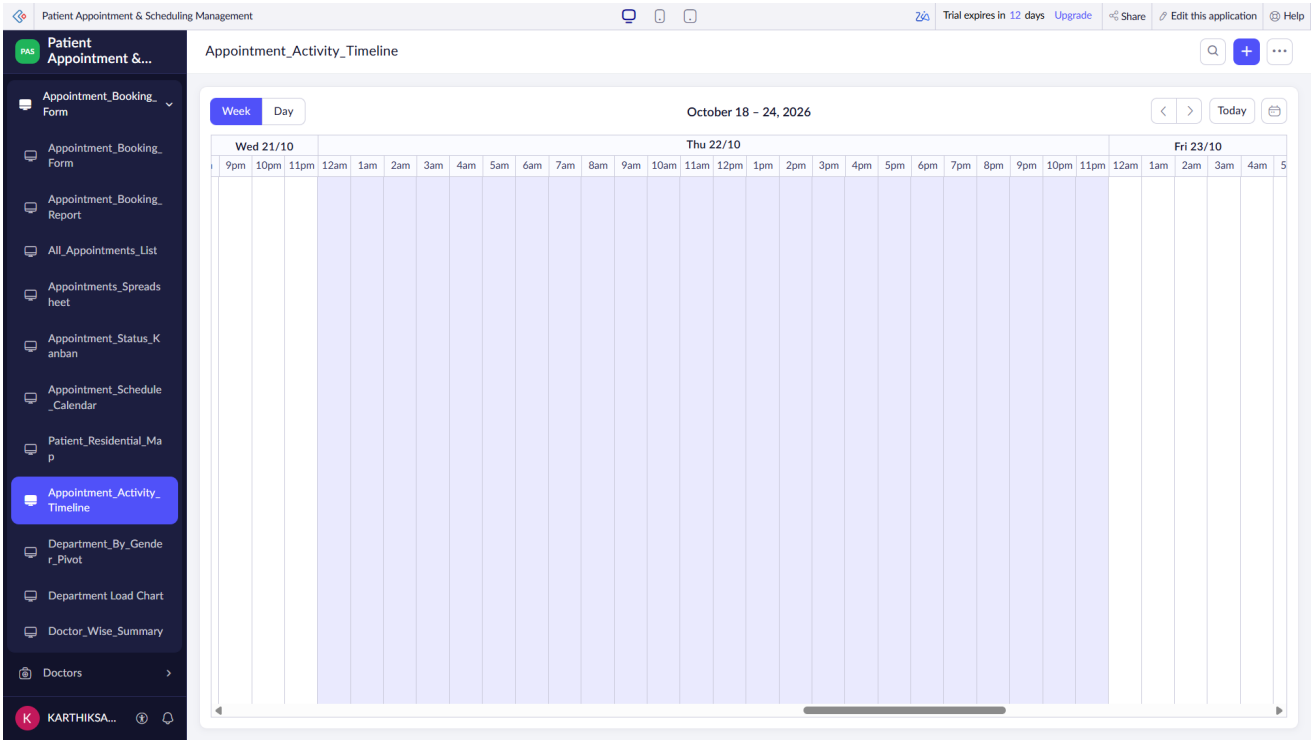

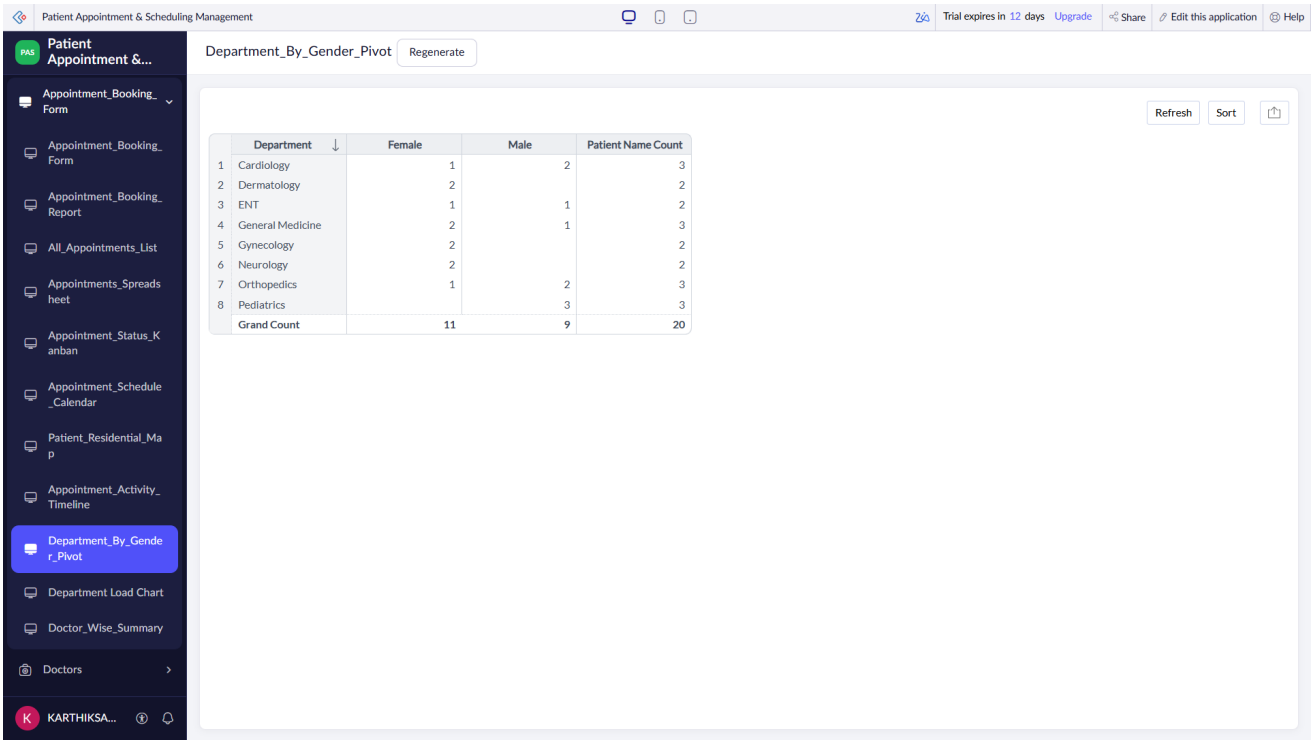

Figure 7. Appointment_Activity_Timeline — timeline view.

	Department	Female	Male	Patient Name Count
1	Cardiology	1	2	3
2	Dermatology	2		2
3	ENT	1	1	2
4	General Medicine	2	1	3
5	Gynecology	2		2
6	Neurology	2		2
7	Orthopedics	1	2	3
8	Pediatrics		3	3
	Grand Count	**11**	**9**	**20**

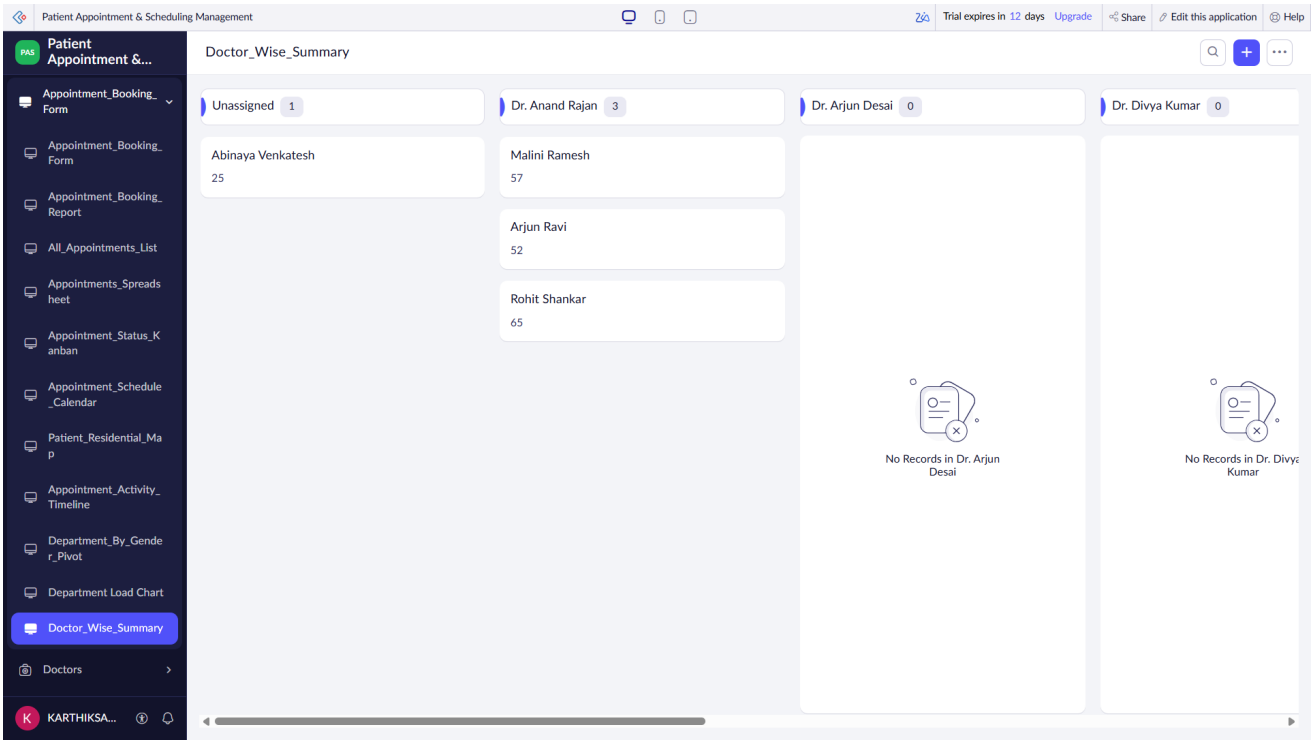

Figure 10. Doctor_Wise_Summary — doctor-grouped summary.

Result:

A suite of nine report views has been documented for the **Patient Appointment & Scheduling Management** application. The list, pivot table, and department chart show 20 appointments across eight medical departments. The timeline capture has no visible entries, and operational actions such as drag-and-drop and role-based edit permissions were not separately verified.
